PROFILE

Having completed a Bachelor of Laws/Journalism degree at the Queensland University of Technology, I was looking for a job that would be rich in life experiences. So, from February 2015 to June 2018 since I graduated, I worked as a Cameraman/Editor for Network 10 Australia in my home city of Brisbane. There I gained a wealth of knowledge about many different aspects of television production. I filmed a variety of production tv shows and shot/edited news for the local Brisbane and National Australian Bulletins. During my time at Network Ten I was able to hone my skills as both a cameraman and editor. Since moving to London I have been fortunate enough to work for many different organisations on a freelance basis. These include; Sky News, ITV, ITN, IMG Media, CNN, CBS (America), ABC (Australia), ZDF (German Television), Global News (Canada) and ORF (Austrian Television) in their London Bureaus.
